## Summary

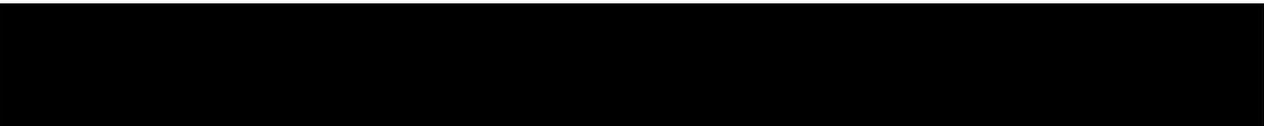

### PART 1: AUTHORISATION TESTS

EDISOFT demonstrated the tests of the Authorisation with the following results:

### PART 2: WFS

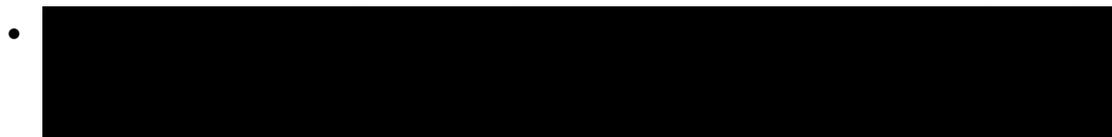

EDISOFT presented the [redacted] in terms of service request and response, with comparison between the existing [redacted] the new EODC-EOP version.

- one situation – true / false – should be bug in ingestion;
- precision is higher for the EODC, but this should not be a problem;

- The use of the clip image for Activity needs to be clarified for release 1 (EMSA);

**OPEN**

- the use of the OR clause not fully clear, but subject of concern by EMSA;
- EDISOFT informed that spatial filters (as found in IMDatE) are still being tested: so far one problem (with the Intersect operator), but bounding box worked well
- EMSA clarified the scope for [REDACTED]
  - In line with examples sent so far – Release 1
  - all others – Release 2

### PART 3: PLANNING, WRAP-UP AND CLOSURE

The main conclusions of the second FAT are as follows:

- the Authorisation service is working; one rule needs to be changed; EMSA would like to see again the final implementation after the correction;
- the [REDACTED] is very advanced; the comparison of schemas revealed only minor differences; however, one adaptation needs to be made with respect to the relation between orders and projects; EDISOFT shall assess the impact and inform EMSA;
- the main priority is now the [REDACTED] EDISOFT shall provide EMSA with processed (histogram stretching) images by Friday, 24<sup>th</sup>;
- the goal is to make only one update of Release 1 that contains all corrections coming out of the ongoing ingestion tests (EMSA will provide all detected issues by the coming week) and the final versions of the [REDACTED]

#### NEXT MEETING

EDISOFT and EMSA agreed to have a meeting on March 28<sup>th</sup>. Apart from making a point of the situation concerning release 1, the main goal is to discuss the planning of the data migration as well as the scope of Release 2.

OPEN

## COMMENT, DECISION, ACTION, ALERT

---

### Action number FAT-AI-01

EDISOFT provided requested feedback on [REDACTED] by March, 06<sup>th</sup>. - Closed

### Action number FAT-AI-02

EDISOFT provided requested feedback on the Authorisation by March, 06<sup>th</sup>. - Closed

### Action number FAT-AI-03

EDISOFT will provide by March 24<sup>th</sup> a set of images resulting from the histogram stretching applied f [REDACTED]

### Action number FAT-AI-04

EDISOFT will provide feedback on the time required for the implementation of the necessary adaptation to the code due to the multiple relations between Orders and Projects.

### Action number FAT-AI-05

Concerning Authorisation, EDISOFT will provide

- an updated version with correction of the rule for Organisation,
- feedback on the timely impact of cache changes,
- an example of a Multi-project scenario.

### Action number FAT-AI-06

EDISOFT will provide asap feedback on the time required for [REDACTED] ue to the current risk of delay.

### Action number FAT-AI-07

EMSA will provides feedback on

- the use of clip images for Activity (see [REDACTED])
- the correct querying of Organisation in th [REDACTED]
