<b>Amendment 13 Recital 5a (new)</b>			
	<i>(5a) Driven by the regulatory framework put in place by the Union and efforts taken by the European industries, Union greenhouse gas emissions were reduced by 23 % between 1990 and 2018, while the economy grew by 61 % over the same period, showing that it is possible to decouple economic growth from greenhouse gas emissions.</i>		Not acceptable (no link to the operative part).
<b>Amendment 14 Recital 6</b>			
(6) Achieving climate neutrality should require a contribution from all economic sectors. In light of the importance of energy production and consumption on greenhouse gas emissions, the transition to a sustainable, affordable and secure energy system relying on a well-functioning internal energy market is essential. The digital transformation, technological innovation, and research and development are also important drivers for achieving the climate-neutrality objective.	(6) Achieving climate neutrality <b>requires</b> all economic sectors, <b>including aviation and maritime transport, to swiftly reduce their emissions to close to zero. The polluter pays principle should be a key factor in that regard.</b> In light of the importance of energy production and consumption on greenhouse gas emissions, the transition to a <b>highly energy efficient and renewables-based</b> sustainable, affordable and secure energy system, <b>while reducing energy poverty</b> , relying on a well-functioning internal energy market is essential. <b>The contribution of the</b>	(6) Achieving climate neutrality should require a contribution from all economic sectors [...] <u>for which emissions or removals of greenhouse gases are regulated in Union law.</u> [...]	Not acceptable (no economic sectors nor particular energy sources should be singled out, and references to additional funding should be avoided as these will be balanced with the ambition of the policies).

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
	<p><i>circular economy to climate neutrality should be expanded by improving resource efficiency and increasing the use of low-carbon materials while promoting waste prevention and recycling.</i> The digital transformation, technological innovation and research and development, <i>which will require additional funding</i>, are also important drivers for achieving the climate-neutrality objective. <i>The Union and Member States will need to adopt ambitious and coherent regulatory frameworks to ensure the contribution of all sectors of the economy to the Union climate objectives.</i></p>		

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
<b>Amendment 15 Recital 6a (new)</b>			
	<p><i>(6a) Cumulative total anthropogenic greenhouse gas emissions over time and the corresponding concentration of greenhouse gases in the atmosphere are in particular relevant for the climate system and temperature increases. The IPCC Special report on Global Warming of 1,5 °C and its underlying scenario database provide the best available and most recent scientific evidence on the remaining global greenhouse gas budget to limit the global temperature increase in the 21st century to 1,5 °C above pre-industrial levels. In order to be consistent with Union commitments of pursuing efforts to limit the temperature increase to 1,5 °C above pre-industrial levels, it is necessary to establish a Union fair share of the remaining global greenhouse gas budget. The greenhouse gas budget is also an important tool to increase transparency and accountability of the Union's climate policies. In its in-depth analysis in support of the Commission Communication of 28</i></p>	<p><i>(6a)</i> In light of the importance of energy production and consumption on greenhouse gas emissions, the transition to a <u>safe</u>, sustainable, affordable and secure energy system relying on a well-functioning internal energy market is essential. The digital transformation, technological innovation, and research and development are also important drivers for achieving the climate-neutrality objective.</p>	<p>Not acceptable.</p>

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
	<p><i>November 2018 entitled ‘A Clean Planet for all - A European long-term strategic vision for a prosperous, modern, competitive and climate neutral economy’, the Commission indicates that a 1, 5 °C compatible EU-28 carbon budget for 2018-2050 would amount to 48 Gt CO<sub>2</sub>. The Commission should establish an EU-27 net greenhouse gas budget, expressed in CO<sub>2</sub> equivalent based on the latest scientific calculations used by the IPCC, which represents the Union’s fair share of the remaining global emissions, in line with the Paris Agreement objectives. The Union’s greenhouse gas budget should guide the establishment of the Union trajectory towards net-zero greenhouse gas emissions by 2050, in particular its future 2030 and 2040 greenhouse gas targets.</i></p>

	<i>on adaptation by developing indicators.</i>	adaptation strategies and plans. <u>The EU should seek to create a favourable regulatory environment for national policies and measures put in place by Member States to adapt to climate change. Improving climate resilience and adaptive capacities to climate change requires shared efforts by all sectors of the economy and society, as well as policy coherence and consistency in all relevant European legislation and policies.</u>	

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
<b>Amendment 37 Recital 14a (new)</b>			
	<p><i>(14a) When adopting their adaptation strategies and plans, Member States should pay special attention to the most impacted areas. In addition, it is essential to promote, conserve and restore biodiversity in order to tap its full potential for climate regulation and adaptation. Adaptation strategies and plans should therefore encourage nature-based solutions and ecosystem-based adaptation that contributes to restoring and preserving biodiversity, and take due account of the territorial specificities and local knowledge, as well as establish concrete measures to protect marine and coastal ecosystems. Furthermore, activities hindering ecosystem ability to adapt to climate change should be removed to ensure the resilience of biodiversity and ecosystem services.</i></p>	<p><u>(14a) Ecosystems, people and economies in all regions of the EU will face major impacts from climate change, such as extreme heat, floods, droughts, water scarcity, sea level rise, thawing glaciers, forest fires, wind throws and agricultural losses. Recent extreme events have already had substantial impacts on ecosystems, affecting carbon sequestration and storage capacities of forest and agricultural land. Enhancing adaptive capacities and resilience help to minimise climate change impacts and to address unavoidable impacts in a socially balanced manner. Preparing early for such impacts is cost-effective and can also bring considerable co-benefits for ecosystems, health and the economy. Nature-based solutions, in particular, can benefit climate-change mitigation, adaptation and biodiversity protection.</u></p>	<p>To be discussed further. The Council position captures most of the gist of the EP amendment.</p>

<b>Amendment 68</b> <b>Recital 23 f (new)</b>			
	<p><i>(23f) Transport infrastructure could play a key role in accelerating the transformation to sustainable and smart mobility by catering for a modal shift to more sustainable transport modes, in particular for freight transport. At the same time, climate-change events, such as rising water levels, extreme weather conditions, drought and rising temperatures, can result in infrastructure damages, operational disruptions, pressures on supply chain capacity and efficiency, and consequently have negative implication for European mobility. Therefore, the completion of the Trans European Transport Networks (TEN-T) core network by 2030 and the completion of the complementary TEN-T network by 2040 is of the utmost importance, while taking into account the obligations set out in Union law on addressing the greenhouse gas emissions of projects during their whole life cycle. Furthermore, the Commission should consider proposing a legislative framework</i></p>		<p>Not acceptable (no link to the operative part).</p>

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
	<i>to increase the risk-management, resilience and climate adaptation of transport infrastructure.</i>		
<b>Amendment 69 Recital 23g (new)</b>			
	<i>(23g) The connectivity of the European railway network, in particular international connections, to make passenger transport by rail more attractive for medium- and long-distance travels and improvements to the capacity of railways and inland waterways for freight, should be at the core of the Union's legislative action.</i>		Not acceptable (no link to the operative part).
<b>Amendment 70 Recital 23h (new)</b>			
	<i>(23h) It is important to ensure that there are sufficient investments in developing appropriate infrastructure for zero-emission mobility, including intermodal platforms and reinforcing the role of the Connecting Europe Facility (CEF) in supporting the transition towards smart, sustainable and safe mobility in the Union.</i>		Not acceptable (no link to the operative part).

<b>Amendment 92</b> <b>Article 10 – paragraph 1 – point 5 a (new)</b> Regulation (EU) 2018/1999 Article 11 a (new)			
	<p><i>(5a) the following Article is inserted:</i></p> <p style="text-align: center;"><i>‘Article 11a</i> <i>Access to justice</i></p> <p><i>1. Member States shall ensure that, in accordance with their national laws, members of the public concerned who have a sufficient interest or who claim the impairment of a right where administrative procedural law of a Member State requires such a right to be a precondition have access to a review procedure before a court of law or other independent and impartial body established by law with a view to challenging the substantive or procedural legality of decisions, acts or omissions subject to Article 10 of Regulation (EU) 2018/1999.</i></p>		<p>Not acceptable (The proposed amendment would have as a consequence that access to justice provisions would also apply to the energy aspects of the Governance Regulation, going beyond the scope of the Aarhus Convention itself, which applies to environmental matters. This goes beyond the scope of the European Climate Law.)</p>
	<p><i>2. Member States shall determine the stage at which decisions, acts or omissions may be challenged.</i></p>		<p>Not acceptable.</p>

COMMISSION PROPOSAL	EUROPEAN PARLIAMENT 1st reading position of 08/10/2020	COUNCIL POSITION Coreper 27/01/2021	COMMENTS
	<p><i>3. Member States shall determine what constitutes a sufficient interest and impairment of a right, consistent with the objective of giving the public concerned wide access to justice. To that end, non-governmental organisation covered by the definition in Article 2(62a) shall be deemed as having a sufficient interest or having rights capable of being impaired for the purpose of paragraph 1 of this Article.</i></p>		Not acceptable.
	<p><i>4. This Article shall not exclude the possibility of a preliminary review procedure before an administrative authority and shall not affect the requirement of exhaustion of administrative review procedures prior to recourse to judicial review procedures, where such a requirement exists under national law. Any such procedure shall be fair, equitable, timely and not prohibitively expensive.</i></p>		Not acceptable.

	5. <i>Member States shall ensure that practical information is made available to the public on access to administrative and judicial review procedures.</i>		Not acceptable.
<b>Amendment 93</b> <b>Article 10 – paragraph 1 – point 5 b (new)</b> Regulation (EU) 2018/1999 Article 15 – paragraph 1			
	<i>(5b) in Article 15, paragraph 1 is replaced by the following:</i> ‘1. By 1 January 2020, and subsequently by 1 January 2029 and every 10 years thereafter, each Member State shall prepare and submit to the Commission its long-term strategy <i>with a 2050 and 30 years perspective</i> . Member States should, where necessary, update those strategies every five years.’;		Clarification needed from the EP.
