11.	(1) In order to achieve smart, sustainable and inclusive growth and to stimulate job creation, the Union needs an up-to-date, high-performance infrastructure to help connect and integrate the Union and all its regions, in the transport, telecommunications and energy sectors. Those connections should help to improve the free movement of persons, goods, capital and services. The trans-European networks should facilitate cross-border connections, foster greater economic, social and territorial cohesion and contribute to a more competitive social market economy and to combating climate change.	(1) In order to achieve smart, sustainable and inclusive growth and to stimulate job creation and to respect the long-term decarbonisation commitments, the Union needs an up-to-date, multimodal high-performance infrastructure to help connect and integrate the Union and all its regions, including remote, outermost, insular, peripheral, mountainous and sparsely populated ones, in the transport, digital and energy sectors. Those connections should help to improve the free movement of persons, goods, capital and services. The trans-European networks should facilitate cross-border connections, foster greater economic, social and territorial cohesion and contribute to a more competitive	(1) In order to achieve smart, sustainable and inclusive growth and to stimulate job creation and to respect the long-term decarbonisation commitments, the Union needs an up-to-date, multimodal high-performance infrastructure to help connect and integrate the Union and all its regions, including remote, outermost, insular, peripheral, mountainous and sparsely populated ones, in the transport, digital and energy sectors. 12.	<p>(2) The aim of the Connecting Europe Facility (the 'Programme') is to accelerate investment in the field of trans-European networks and to leverage funding from both the public and the private sectors, while increasing legal certainty and respecting the principle of technological neutrality. The Programme should enable synergies between the transport, energy and digital sectors to be harnessed to the full extent, thus enhancing the effectiveness of Union action and enabling implementing costs to be optimised.</p>	<p>(2) The aim of the Connecting Europe Facility (the 'Programme') is to accelerate investment in the field of trans-European networks and to leverage funding from both the public and the private sectors, while increasing legal certainty and respecting the principle of technological neutrality. 18.		(3a) The Programme should guarantee a high level of transparency and ensure public consultation in compliance with the applicable Union and national legislation.	(3a) The Programme should guarantee a high level of transparency and ensure public consultation in compliance with the applicable Union and national legislation.	(3a) The Programme should guarantee a high level of transparency and ensure public consultation in compliance with the applicable Union and national legislation.
20.	(4) Reflecting the importance of tackling climate change in line with Union's commitments to implement the Paris Agreement, and the commitment to the United Nations Sustainable Development Goals, this Regulation should therefore mainstream climate action and lead to the achievement of an overall target of 25% of the EU budget expenditures supporting climate objectives <sup>3</sup> . Actions under this Programme are expected to contribute 60% of the overall financial envelope of the Programme to climate objectives, based inter alia on the following Rio markers: i) 100% for the expenditures relating to railway infrastructure, alternative fuels, clean urban transport, electricity transmission, electricity storage, smart grids,	(4) Reflecting the importance of tackling climate change in line with Union's commitments to implement the Paris Agreement, and the commitment to the United Nations Sustainable Development Goals, this Regulation should therefore mainstream climate action and lead to the achievement of an overall target of 25% of the EU budget expenditures supporting climate objectives <sup>1</sup> . 60.	<p>(20) Innovative infrastructure technologies that enable the transition to a low carbon energy and mobility systems and improve security of supply are essential in view of the Union's decarbonisation agenda. In particular, in its Communication of 23 November 2017 "Communication on strengthening Europe's energy networks"<sup>13</sup>, the Commission emphasised that the role of electricity, where renewable energy will constitute half of the electricity generation by 2030, will increasingly be driving the decarbonisation of sectors so far dominated by fossil fuels, such as transport, industry and heating and cooling and that accordingly, the focus under the trans-European energy infrastructure policy is increasingly on electricity interconnections, electricity storages and smart grids projects. To support the Union's decarbonisation objectives, due consideration and priority should be given to technologies and projects contributing to the transition to a low carbon economy. The</p>	<p>(20) Innovative infrastructure technologies that enable the transition to a low emission energy and mobility systems and improve security of supply, seeking greater energy independence for the Union, are essential in view of the Union's decarbonisation agenda. In particular, in its Communication of 23 November 2017 "Communication on strengthening Europe's energy networks"<sup>12</sup>, the Commission emphasised that the role of electricity, where renewable energy will constitute half of the electricity generation by 2030, will increasingly be driving the decarbonisation of sectors so far dominated by fossil fuels, such as transport, industry and heating and cooling and that accordingly, the focus under the trans-European energy infrastructure policy must be on electricity interconnections, electricity storages smart grids projects, and gas infrastructure investments. To support the Union's decarbonisation objectives, internal market integration and security of supply, due</p>	<p>(20) Innovative infrastructure technologies that enable the transition to a low emission energy and mobility systems and improve security of supply, seeking greater energy independence for the Union, are essential in view of the Union's decarbonisation agenda. 125.	CHAPTER I GENERAL PROVISIONS			
126.	Article 1 Subject matter			
127.	This Regulation establishes the Connecting Europe Facility (the 'Programme').	This Regulation establishes the Connecting Europe Facility (the 'Programme').	This Regulation establishes the Connecting Europe Facility (the 'Programme') <u>for the period from 1 January 2021 to 31 December 2027.</u>	
128.	It lays down the objectives of the Programme, the budget for the period 2021-2027, the forms of Union funding and the rules for providing such funding.	It lays down the objectives of the Programme, the budget for the period 2021-2027, the forms of Union funding and the rules for providing such funding.	It lays down the objectives of the Programme, the budget for the period 2021-2027, the forms of Union funding and the rules for providing such funding.	It lays down the objectives of the Programme, the budget for the period 2021-2027, the forms of Union funding and the rules for providing such funding.
129.	Article 2 Definitions			
130.	For the purposes of this Regulation, the following definitions shall apply:		For the purposes of this Regulation, the following definitions shall apply:	For the purposes of this Regulation, the following definitions shall apply:
131.	(a) "action" means any activity which has been identified as financially and technically independent, has a set time-frame and is necessary for the implementation of a project;	(a) "action" means any activity which has been identified as financially and technically independent, has a set time-frame and is necessary for the implementation of a project;	(a) "action" means any activity which has been identified as financially and technically independent, has a set time-frame and is necessary for the implementation of a project;	(a) "action" means any activity which has been identified as financially and technically independent, has a set time-frame and is necessary for the implementation of a project;
133.	(b) "alternative fuels" means alternative fuels as defined in Article 2(1) of Directive 2014/94/EU;	(b) "alternative fuels" means alternative fuels for all modes of transport as defined in Article 2(1) of Directive 2014/94/EU;	(b) "alternative fuels" means alternative fuels for all modes of transport as defined in Article 2(1) of Directive 2014/94/EU;	(b) "alternative fuels" means alternative fuels for all modes of transport as defined in Article 2(1) of Directive 2014/94/EU;
136.		(ca) "beneficiary" means an entity with legal personality with whom a grant agreement has been signed;	(ca) "beneficiary" means an entity with legal personality with whom a grant agreement has been signed;	(ca) "beneficiary" means an entity with legal personality with whom a grant agreement has been signed;

138.	(d) 'Blending operation' means actions supported by the EU budget, including within blending facilities pursuant to Article [2(6)] of the Regulation (EU, Euratom) 2018/XXX (the 'Financial Regulation'), combining non-repayable forms of support and/or financial instruments from the EU budget with repayable forms of support from development or other public finance institutions, as well as from commercial finance institutions and investors;	(d) "blending operation" means actions supported by the EU budget, including within blending facilities pursuant to Article 2(6) of the Regulation (EU, Euratom) 2018/XXX (the 'Financial Regulation'), combining non-repayable forms of support and/or financial instruments <b>and/or budgetary guarantees</b> from the EU budget with repayable forms of support from development or other public finance institutions, as well as from commercial finance institutions and investors;	(d) 'Blending operation' means actions supported by the EU budget, including within blending facilities pursuant to Article [2(6)] of the Regulation (EU, Euratom) 2018/XXX (the 'Financial Regulation'), combining non-repayable forms of support and/or financial instruments <b>and/or budgetary guarantees</b> from the EU budget with repayable forms of support from development or other public finance institutions, as well as from commercial finance institutions and investors;	(d) 'Blending operation' means actions supported by the EU budget, including within blending facilities pursuant to Article [2(6)] of the Regulation (EU, Euratom) 2018/XXX (the 'Financial Regulation'), combining non-repayable forms of support and/or financial instruments <b>and/or budgetary guarantees</b> from the EU budget with repayable forms of support from development or other public finance institutions, as well as from commercial finance institutions and investors;
141.	(e) "comprehensive network" means the transport infrastructure identified in accordance with Chapter II of Regulation (EU) No 1315/2013;		(e) "comprehensive network" means the transport infrastructure identified in accordance with Chapter II of Regulation (EU) No 1315/2013;	(e) "comprehensive network" means the transport infrastructure identified in accordance with Chapter II of Regulation (EU) No 1315/2013;
142.	(f) "core network" means the transport infrastructure identified in accordance with Chapter III of Regulation (EU) No 1315/2013;		(f) "core network" means the transport infrastructure identified in accordance with Chapter III of Regulation (EU) No 1315/2013;	(f) "core network" means the transport infrastructure identified in accordance with Chapter III of Regulation (EU) No 1315/2013;
143.	(g) "core network corridors" means an instrument to facilitate the coordinated implementation of the core network as provided for in Chapter IV of Regulation (EU) No 1315/2013 and listed in Part III of the Annex to this Regulation;		(g) "core network corridors" means an instrument to facilitate the coordinated implementation of the core network as provided for in Chapter IV of Regulation (EU) No 1315/2013 and listed in Part III of the Annex to this Regulation;	(g) "core network corridors" means an instrument to facilitate the coordinated implementation of the core network as provided for in Chapter IV of Regulation (EU) No 1315/2013 and listed in Part III of the Annex to this Regulation;
145.		(ga) "cross border link" in the transport sector means a project of common interest	(ga) "cross border link" in the transport sector means a project of common interest	(ga) "cross border link" in the transport sector means a project of common interest

		which ensures the continuity of the TEN-T network between Member States or between a Member State and a third country;	which ensures the continuity of the TEN-T network between Member States or between a Member State and a third country;	which ensures the continuity of the TEN-T network between Member States or between a Member State and a third country;
147.		(gb) "missing link" is an all modes transport missing section of the TEN-T network or a transport section that is providing the connection of core or comprehensive networks with the TEN-T corridors which hampers the continuity of the TEN-T network or containing one or more bottleneck affecting the continuity of the TEN-T network;	<b>(gb) "missing link" is an all modes transport missing section of the TEN-T network or a transport section that is providing the connection of core or comprehensive networks with the TEN-T corridors which hampers the continuity of the TEN-T network or containing one or more bottleneck affecting the continuity of the TEN-T network;</b>	<b>(gb) "missing link" is an all modes transport missing section of the TEN-T network or a transport section that is providing the connection of core or comprehensive networks with the TEN-T corridors which hampers the continuity of the TEN-T network or containing one or more bottleneck affecting the continuity of the TEN-T network;</b>
149.		<b>(gc) "dual-use infrastructure" means a transport network infrastructure that addresses both civilian and defence needs;</b>	(gc)"dual-use infrastructure" means a transport network infrastructure that addresses both civilian and defence needs;	(gc)"dual-use infrastructure" means a transport network infrastructure that addresses both civilian and defence needs;
150.	(h) "cross-border project in the field of renewable energy" means a project selected or eligible to be selected under a cooperation agreement or any other kind of arrangements between Member States or arrangements between Member States and third countries as defined in Articles 6, 7, 9 or 11 of	(h) "cross-border project in the field of renewable energy" means a project selected or eligible to be selected under a cooperation agreement or any other kind of arrangements between at least two Member States or arrangements between at least one Member State and a third country or countries as defined	(h) "cross-border project in the field of renewable energy" means a project selected or eligible to be selected under a cooperation agreement or any other kind of arrangements between at least two Member States or arrangements between at least one Member State and a third country or countries as defined	(h) "cross-border project in the field of renewable energy" means a project selected or eligible to be selected under a cooperation agreement or any other kind of arrangements between at least two Member States or arrangements between at least one Member State and a third country or countries as defined

	Directive 2009/82/EC in the planning or deployment of renewable energy, in accordance with the criteria set out in Part IV of the Annex to this Regulation;	in Articles 8, 9, 11 and 13 of Directive (EU) 2018/2001 in the planning or deployment of renewable energy, in accordance with the criteria set out in Part IV of the Annex to this Regulation;	in Articles 8, 9, 11 and 13 of Directive (EU) 2018/2001 in the planning or deployment of renewable energy, in accordance with the criteria set out in Part IV of the Annex to this Regulation;	defined in Articles 8, 9, 11 and 13 of Directive (EU) 2018/2001 in the planning or deployment of renewable energy, in accordance with the criteria set out in Part IV of the Annex to this Regulation;
152.		(ha) "energy efficiency first" means energy efficiency first as referred to in Article 2(18) of Regulation (EU) 2018/1999;	(ha) "energy efficiency first" means energy efficiency first as referred to in Article 2(18) of Regulation (EU) 2018/1999.	(ha) "energy efficiency first" means energy efficiency first as referred to in Article 2(18) of Regulation (EU) 2018/1999.
153.	(i) "digital connectivity infrastructure" means very high capacity networks, 5G systems, very high quality local wireless connectivity, backbone networks, as well as operational digital platforms directly associated with transport and energy infrastructure;	(i) "digital connectivity infrastructure" means very high capacity networks, 5G systems, very high quality local wireless connectivity, backbone networks, as well as operational digital platforms directly associated with transport and energy infrastructure;	(i) "digital connectivity infrastructure" means very high capacity networks, 5G systems, very high quality local wireless connectivity, backbone networks, as well as operational digital platforms directly associated with transport and energy infrastructure;	(i) "digital connectivity infrastructure" means very high capacity networks, 5G systems, very high quality local wireless connectivity, backbone networks, as well as operational digital platforms directly associated with transport and energy infrastructure;
154.	(j) "5G systems" means a set of digital infrastructure elements based on globally agreed standards for mobile and wireless communications technology used for connectivity and value-added services with advanced performance characteristics such as very high data rates and capacity, low latency, high reliability, or supporting a high number of connected devices;.	(j) "5G systems" means a set of digital infrastructure elements based on globally agreed standards for mobile and wireless communications technology used for connectivity and value-added services with advanced performance characteristics such as very high data rates and capacity, low latency communications, ultra-high reliability, or supporting a high number of connected devices;	(j) "5G systems" means a set of digital infrastructure elements based on globally agreed standards for mobile and wireless communications technology used for connectivity and value-added services with advanced performance characteristics such as very high data rates and capacity, low latency communications, ultra-high reliability, or supporting a high number of connected devices;	(j) "5G systems" means a set of digital infrastructure elements based on globally agreed standards for mobile and wireless communications technology used for connectivity and value-added services with advanced performance characteristics such as very high data rates and capacity, low latency communications, ultra-high reliability, or supporting a high number of connected devices;

156.	(k) "5G corridor" means a transport path, road or railway, fully covered with digital connectivity infrastructure and in particular 5G systems, enabling the uninterrupted provision of synergy digital services such as connected and automated mobility or similar smart mobility services for railways;	(k) "5G corridor" means a transport path, road, railway or inland waterway, fully covered with digital connectivity infrastructure and in particular 5G systems, enabling the uninterrupted provision of synergy digital services such as connected and automated mobility, similar smart mobility services for railways or digital connectivity on inland waterways;	(k) "5G corridor" means a transport path, road, railway or inland waterway, fully covered with digital connectivity infrastructure and in particular 5G systems, enabling the uninterrupted provision of synergy digital services such as connected and automated mobility, similar smart mobility services for railways or digital connectivity on inland waterways;	(k) "5G corridor" means a transport path, road, railway or inland waterway, fully covered with digital connectivity infrastructure and in particular 5G systems, enabling the uninterrupted provision of synergy digital services such as connected and automated mobility, similar smart mobility services for railways or digital connectivity on inland waterways;
158.	(l) "operational digital platforms directly associated with transport and energy infrastructure" means physical and virtual information communication technology ("ICT") resources, operating on top of the communication infrastructure, which support the flow, storage, processing and analysis of transport and/or energy infrastructure data;	(l) "operational digital platforms directly associated with transport and energy infrastructure" means physical and virtual information communication technology ("ICT") resources, operating on top of the communication infrastructure, which support the flow, storage, processing and analysis of transport and/or energy infrastructure data;	(l) "operational digital platforms directly associated with transport and energy infrastructure" means physical and virtual information communication technology ("ICT") resources, operating on top of the communication infrastructure, which support the flow, storage, processing and analysis of transport and/or energy infrastructure data;	(l) "operational digital platforms directly associated with transport and energy infrastructure" means physical and virtual information communication technology ("ICT") resources, operating on top of the communication infrastructure, which support the flow, storage, processing and analysis of transport and/or energy infrastructure data;
159.	(m) "project of common interest" means a project identified in Regulation (EU) No 1315/2013 or Regulation (EU) No 347/2013 or in Article 8 of this Regulation;	(m) "project of common interest" means a project identified in Regulation (EU) No 1315/2013 or Regulation (EU) No 347/2013 or in Article 8 of this Regulation;	(m) "project of common interest" means a project identified in Regulation (EU) No 1315/2013 or Regulation (EU) No 347/2013 or in Article 8 of this Regulation;	(m) "project of common interest" means a project identified in Regulation (EU) No 1315/2013 or Regulation (EU) No 347/2013 or in Article 8 of this Regulation;
160.	(n) "studies" means activities needed to prepare project implementation, such as preparatory, mapping, feasibility,	(n) "studies" means activities needed to prepare project implementation, such as preparatory, mapping, feasibility,	(n) "studies" means activities needed to prepare project implementation, such as preparatory, mapping, feasibility,	(n) "studies" means activities needed to prepare project implementation, such as preparatory, mapping, feasibility,

	evaluation, testing and validation studies, including in the form of software, and any other technical support measure, including prior action to define and develop a project and decide on its financing, such as reconnaissance of the sites concerned and preparation of the financial package;	evaluation, testing and validation studies, including in the form of software, and any other technical support measure, including prior action to define and develop a project and decide on its financing, such as reconnaissance of the sites concerned and preparation of the financial package;	evaluation, testing and validation studies, including in the form of software, and any other technical support measure, including prior action to define and develop a project and decide on its financing, such as reconnaissance of the sites concerned and preparation of the financial package;	evaluation, testing and validation studies, including in the form of software, and any other technical support measure, including prior action to define and develop a project and decide on its financing, such as reconnaissance of the sites concerned and preparation of the financial package;
162.	(o) "socio-economic drivers" means entities which by their mission, nature or location can directly or indirectly generate important socio-economic benefits to citizens, business and local communities located in their surrounding territory;	(o) "socio-economic drivers" means entities which by their mission, nature or location can directly or indirectly generate important socio-economic benefits to citizens, business and local communities located in their surrounding territory or in their area of influence;	(o) "socio-economic drivers" means entities which by their mission, nature or location can directly or indirectly generate important socio-economic benefits to citizens, business and local communities located in their surrounding territory or in their area of influence;	(o) "socio-economic drivers" means entities which by their mission, nature or location can directly or indirectly generate important socio-economic benefits to citizens, business and local communities located in their surrounding territory or in their area of influence;
163.	(p) "third country" means a country that is not member of the European Union;	(p) "third country" means a country that is not member of the European Union;	(p) "third country" means a country that is not member of the European Union;	(p) "third country" means a country that is not member of the European Union;
165.	(q) "very high capacity networks" means very high capacity networks as defined in Article [2 (XX)] of Directive (EU) 2018/XXX [the European Electronic Communications Code]	(q) "very high capacity networks" means very high capacity networks as defined in Article 2(2) of Directive (EU) 2018/172;	(q) "very high capacity networks" means very high capacity networks as defined in Article [2 (2)] of Directive (EU) 2018/ <del>1972 of the European Parliament and of the Council</del> <sup>18</sup> <del>XXX</del>	(q) "very high capacity networks" means very high capacity networks as defined in Article [2 (2)] of Directive (EU) 2018/ <b>1972 of the European Parliament and of the Council</b> <sup>19</sup> ;

<sup>18</sup> Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36).

<sup>19</sup> Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36).

			<u>Communications Code</u> ];	
166.	(r) "works" means the purchase, supply and deployment of components, systems and services including software, the carrying-out of development and construction and installation activities relating to a project, the acceptance of installations and the launching of a project.	(r) "works" means the purchase, supply and deployment of components, systems and services including software, the carrying-out of development and construction and installation activities relating to a project, the acceptance of installations and the launching of a project.	(r) "works" means the purchase, supply and deployment of components, systems and services including software, the carrying-out of development and construction and installation activities relating to a project, the acceptance of installations and the launching of a project.	(r) "works" means the purchase, supply and deployment of components, systems and services including software, the carrying-out of development and construction and installation activities relating to a project, the acceptance of installations and the launching of a project.

168.	<i>Article 3 Objectives</i>			
170.	1. The Programme has the general objective to develop and modernise the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments and with emphasis on synergies among sectors.	1. The Programme has the general objective to <b>build</b> , develop, modernise <b>and complete</b> the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments, <b>increasing European competitiveness, smart, sustainable and inclusive growth</b> , territorial, <b>social and economic</b> cohesion, <b>access to</b> and integration of the internal market and with emphasis on synergies among <b>transport, energy and digital</b> sectors.	1. The Programme has the general objective to <b>build</b> , develop, modernise <b>and complete</b> the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments, <b>increasing European competitiveness, smart, sustainable and inclusive growth</b> , territorial, <b>social and economic</b> cohesion, <b>access to</b> and integration of the internal market and with emphasis on synergies among <b>transport, energy and digital</b> sectors.	1. The Programme has the general objective to <b>build</b> , develop, modernise <b>and complete</b> the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments, <b>increasing European competitiveness, smart, sustainable and inclusive growth</b> , territorial, <b>social and economic</b> cohesion, <b>access to</b> and integration of the internal market and with emphasis on synergies among <b>transport, energy and digital</b> sectors.
171.	2. The Programme has the following specific objectives:	2. The Programme has the following specific objectives:	2. The Programme has the following specific objectives:	2. The Programme has the following specific objectives:
172.	(a) In the transport sector:	(a) In the transport sector:	(a) In the transport sector:	(a) In the transport sector:
174.	(i) to contribute to the development of projects of common interest relating to efficient and interconnected networks and infrastructure for smart, sustainable, inclusive, safe and secure mobility;	(i) <b>in compliance with the objectives of Regulation (EU) No 1315/2013</b> , to contribute to the development of projects of common interest relating to efficient, interconnected <b>and multimodal</b> networks and infrastructure for smart, <b>interoperable</b> , sustainable, inclusive, <b>accessible</b> , safe and secure	(i) <b>in compliance with the objectives of Regulation (EU) No 1315/2013</b> , to contribute to the development of projects of common interest relating to efficient, interconnected <b>and multimodal</b> networks and infrastructure for smart, <b>interoperable</b> , sustainable, inclusive, <b>accessible</b> , safe and secure	(i) <b>in compliance with the objectives of Regulation (EU) No 1315/2013</b> , to contribute to the development of projects of common interest relating to efficient, interconnected <b>and multimodal</b> networks and infrastructure for smart, <b>interoperable</b> , sustainable, inclusive, <b>accessible</b> , safe and secure

		mobility;	mobility;	mobility;
176.	(ii) to adapt the TEN-T networks to military mobility needs;	(ii) to <b><i>adapt parts of the trans-European transport network for a dual use of the transport infrastructure in view of improving both civilian and military</i></b> mobility;	(ii) to <b><i>adapt parts of the trans-European transport network for a dual use of the transport infrastructure in view of improving both civilian and military</i></b> mobility;	(ii) to <b><i>adapt parts of the trans-European transport network for a dual use of the transport infrastructure in view of improving both civilian and military</i></b> mobility;

178.	(b) In the energy sector, to contribute to the development of projects of common interest relating to further integration of the internal energy market, interoperability of networks across borders and sectors, facilitating decarbonisation and ensuring security of supply, and to facilitate cross-border cooperation in the area of renewable energy;	(b) In the energy sector, to contribute to the development of projects of common interest relating to further integration of <b><i>an efficient and competitive</i></b> internal energy market, interoperability of networks across borders and sectors, facilitating decarbonisation <b><i>of the economy, promoting energy efficiency</i></b> and ensuring security of supply, and to facilitate cross-border cooperation in the area of <b><i>energy, including</i></b> renewable energy;	(b) In the energy sector, to contribute to the development of projects of common interest relating to further integration of <b><i>an efficient and competitive</i></b> internal energy market, interoperability of networks across borders and sectors, facilitating decarbonisation <b><i>of the economy, promoting energy efficiency</i></b> and ensuring security of supply, and to facilitate cross-border cooperation in the area of <b><i>energy, including</i></b> renewable energy;	(b) In the energy sector, to contribute to the development of projects of common interest relating to further integration of <b><i>an efficient and competitive</i></b> internal energy market, interoperability of networks across borders and sectors, facilitating decarbonisation <b><i>of the economy, promoting energy efficiency</i></b> and ensuring security of supply, and to facilitate cross-border cooperation in the area of <b><i>energy, including</i></b> renewable energy;
180.	(c) In the digital sector, to contribute to the deployment of very high capacity digital networks and 5G systems, to the increased resilience and capacity of digital backbone networks on EU territories by linking them to neighbouring territories, as well to the digitalisation of transport and energy networks.	(c) In the digital sector, to contribute to <b><i>the development of projects of common interest relating to</i></b> the deployment of <b><i>safe and secure</i></b> very high capacity digital networks and 5G systems, to the increased resilience and capacity of digital backbone networks on EU territories by linking them to neighbouring territories, as well to the digitalization of transport and energy networks.	c) In the digital sector, to contribute to <b><i>the development of projects of common interest relating to</i></b> the deployment of <b><i>safe and secure</i></b> very high capacity digital networks and 5G systems, to the increased resilience and capacity of digital backbone networks on EU territories by linking them to neighbouring territories, as well to the digitalization of transport and energy networks.	c) In the digital sector, to contribute to <b><i>the development of projects of common interest relating to</i></b> the deployment of <b><i>safe and secure</i></b> very high capacity digital networks and 5G systems, to the increased resilience and capacity of digital backbone networks on EU territories by linking them to neighbouring territories, as well to the digitalization of transport and energy networks.

181.	<i>Article 4 Budget</i>			
183.	1. The financial envelope for the implementation of the Programme for the period 2021-2027 is set at EUR 42,265,493,000 in current prices.	1. The financial envelope for the implementation of the Programme for the period 2021-2027 is set at <b>EUR 43 850 768 000 in constant prices (EUR XXX in current prices)</b> .	1. The financial envelope for the implementation of the Programme for the period 2021-2027 is set at <b>EUR 33,710,000,000</b> in current prices.	
184.	2. The distribution of this amount shall be as follows:	2. The distribution of this amount shall be as follows:	2. The distribution of this amount shall be as follows:	2. The distribution of this amount shall be as follows:
186.	(a) up to EUR 30,615,493,000 for the specific objectives referred to in Article 3(2)(a), of which:	(a) <b>EUR 33 513 524 000 in constant prices (EUR XXX in current prices)</b> for the specific objectives referred to in Article 3(2)(a), of which:	(a) <b>EUR 25,807,000,000</b> for the specific objectives referred to in Article 3(2)(a), of which:	
188.	(i) EUR 12,830,000,000 from the European Strategic Investment cluster;	(i) <b>EUR 17 746 000 000 in constant prices (EUR XXX in current prices)</b> from the European Strategic Investment cluster;	(i) <b>EUR 12,830,000,000</b> from the European Strategic Investment cluster, <u>out of which EUR 1,559,800,000 to be spent exclusively for the completion of missing major cross-border railway links between Member States eligible for funding from the Cohesion Fund;</u>	
190.	(ii) EUR 11,285,493,000 transferred from the Cohesion Fund to be spent in line with this Regulation exclusively in Member States eligible for funding from the Cohesion Fund;	(ii) <b>EUR 10 000 000 000 in constant prices (EUR 11,285,493,000 in current prices)</b> transferred from the Cohesion Fund to be spent in line with this Regulation exclusively in Member States eligible for funding from the Cohesion Fund;	(ii) <b>EUR 11,286,000,000</b> transferred from the Cohesion Fund to be spent in line with this Regulation exclusively in Member States eligible for funding from the Cohesion Fund;	
192. In the energy sector <b>only</b> the following actions shall be eligible to receive Union financial assistance under this Regulation:
309.	(a) actions relating to projects of common interest as set out at Article 14 of Regulation (EU) No 347/2013;	(a) actions relating to projects of common interest as set out at Article 14 of Regulation (EU) No 347/2013;	(a) actions relating to projects of common interest as set out at Article 14 of Regulation (EU) No 347/2013;	(a) actions relating to projects of common interest as set out at Article 14 of Regulation (EU) No 347/2013;
310.	(b) actions supporting cross-border projects in the field of renewable energy, including their conception, as defined in Part IV of	(b) actions supporting cross-border projects in the field of renewable energy <b>including innovative solutions as well as</b>	(b) actions supporting cross-border projects in the field of renewable energy <b>including innovative solutions as well as</b>	(b) actions supporting cross-border projects in the field of renewable energy <b>including innovative solutions as well as</b>

	the Annex to this Regulation, subject to the fulfilment of the conditions laid down in Article 7 of this Regulation.	<b>storage of renewable energy, and</b> their conception, as defined in Part IV of the Annex to this Regulation, subject to the fulfilment of the conditions laid down in Article 7 of this Regulation.	<b>storage of renewable energy, and</b> their conception, as defined in Part IV of the Annex to this Regulation, subject to the fulfilment of the conditions laid down in Article 7 of this Regulation.	<b>storage of renewable energy, and</b> their conception, as defined in Part IV of the Annex to this Regulation, subject to the fulfilment of the conditions laid down in Article 7 of this Regulation.
311.	4. In the digital sector, the following actions shall be eligible to receive Union financial assistance under this Regulation:	4. In the digital sector the following actions shall <b>only</b> be eligible to receive Union financial assistance under this Regulation:	4. In the digital sector the following actions shall <b>only</b> be eligible to receive Union financial assistance under this Regulation:	4. In the digital sector the following actions shall <b>only</b> be eligible to receive Union financial assistance under this Regulation:
313.	(a) actions supporting Gigabit connectivity of socio-economic drivers;	(a) actions supporting <b>the deployment of and access to very high-capacity networks, including 5G systems, capable of providing</b> Gigabit connectivity <b>in areas where</b> socioeconomic drivers <b>are located</b> ;	(a) actions supporting <b>the deployment of and access to very high-capacity networks, including 5G systems, capable of providing</b> Gigabit connectivity <b>in areas where</b> socioeconomic drivers <b>are located</b> ;	(a) actions supporting <b>the deployment of and access to very high-capacity networks, including 5G systems, capable of providing</b> Gigabit connectivity <b>in areas where</b> socioeconomic drivers <b>are located</b> ;
314.	(b) actions supporting the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions;	(b) actions supporting the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions;	(b) actions supporting the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions;	(b) actions supporting the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions;
315.	(c) actions implementing uninterrupted coverage with 5G systems of all major terrestrial transport paths, including the trans-European transport networks;	(c) actions implementing uninterrupted coverage with 5G systems of all major transport paths, including the trans-European transport networks;	(c) actions implementing uninterrupted coverage with 5G systems of all major transport paths, including the trans-European transport networks;	(c) actions implementing uninterrupted coverage with 5G systems of all major transport paths, including the trans-European transport networks;
317.	(d) actions supporting deployment of backbone networks including with submarine cables, across Member States and between the Union and third countries;	(d) actions supporting deployment <b>of new or significant upgrade of existing</b> backbone networks including submarine cables, <b>within and between</b> Member States	(d) actions supporting deployment <b>of new or significant upgrade of existing</b> backbone networks including submarine cables, <b>within and between</b> Member States and	(d) actions supporting deployment <b>of new or significant upgrade of existing</b> backbone networks including submarine cables, <b>within and between</b> Member States and

		and between the Union and third countries;	between the Union and third countries;	between the Union and third countries;
319.	(f) actions implementing digital connectivity infrastructure requirements related to cross-border projects in the areas of transport or energy and/or supporting operational digital platforms directly associated to transport or energy infrastructures.	(f) actions implementing digital connectivity infrastructure requirements related to cross-border projects in the areas of transport or energy and/or supporting operational digital platforms directly associated to transport or energy infrastructures.	(f) actions implementing digital connectivity infrastructure requirements related to cross-border projects in the areas of transport or energy and/or supporting operational digital platforms directly associated to transport or energy infrastructures.	(f) actions implementing digital connectivity infrastructure requirements related to cross-border projects in the areas of transport or energy and/or supporting operational digital platforms directly associated to transport or energy infrastructures.
320.	An indicative list of eligible projects in the digital sector is provided for in Part V of the Annex.	An indicative list of eligible projects in the digital sector is provided for in Part V of the Annex.	An indicative list of eligible projects in the digital sector is provided for in Part V of the Annex.	An indicative list of eligible projects in the digital sector is provided for in Part V of the Annex.

321.	<i>Article 10</i> <b>Synergies between the transport, energy and digital sectors</b>			
325.	1. Actions contributing to the achievement of one or more objectives of at least two sectors, as provided for in Article 3(2) (a), (b) and (c) shall be eligible to receive Union financial assistance under this Regulation. Such actions shall be implemented through specific cross-sectoral work programmes addressing at least two sectors, including specific award criteria and financed with budget contributions from the sectors involved.	1. Actions contributing <b>simultaneously</b> to the achievement of one or more objectives of at least two sectors, as provided for in Article 3(2)(a), (b) and (c) shall be eligible to receive Union financial assistance under this Regulation <b>and to benefit from a higher co-funding rate, in accordance with Article 14.</b> Such actions shall be implemented through work programmes addressing at least two sectors, including specific award criteria and financed with budget contributions from the sectors involved.	1. Actions contributing <b>simultaneously</b> to the achievement of one or more objectives of at least two sectors, as provided for in Article 3(2)(a), (b) and (c) shall be eligible to receive Union financial assistance under this Regulation <b>and to benefit from a higher co-funding rate, in accordance with Article 14.</b> Such actions shall be implemented through work programmes addressing at least two sectors, including specific award criteria and financed with budget contributions from the sectors involved.	1.
