

Eurosur Fusion Services and the ways to support the prevention, detection and fight against Environmental Crime in the maritime domain.

Cooperation on Coast Guard Functions

Improve situational awareness

Increase reaction capability

TC

- Prevention
- Combat irregular migration
- Combat cross border crime and environmental crimes
- Save more lives

COMMON APPLICATION OF SURVEILLANCE TOOLS

Eurosur Fusion Services

Purpose:

- centralized supply of **surveillance** information for situational pictures

Extended scope:

- selective monitoring of designated (third-country) ports and coasts / pre-frontier areas at the external borders identified by risk analysis + **BCPs, Air, Monitoring of migration flows (sec. mov.)**
- monitoring and tracking suspected vessels at sea
- monitoring of designated areas in order to detect, identify and track vessels
- environmental assessment of designated areas

Sources:

- satellite imagery
- ship reporting systems
- other sensors *mounted on vehicles, vessels or other crafts*
- **Copernicus - the EU earth observation program**

Eurosur components:

“For the exchange of information and for the cooperation in the field of border control”

- National coordination centers
- National situational pictures
- A European situational picture including external border sections with impact levels
- Specific situational pictures
- EUROSUR fusion services
- Integrated planning

Copernicus services address six thematic areas:

Services monitoring Earth systems

Land Monitoring

Marine Monitoring

Atmosphere Monitoring

Horizontal services

Emergency Management

Climate Change

Security

- **Frontex is one of the three entrusted entities providing Copernicus' Security Service**

- Border Surveillance Service

- Maritime Surveillance Service

- Support to EU External Action

COMMON APPLICATION OF SURVEILLANCE TOOLS

Eurosur Fusion Services

Copernicus Marine Environment Monitoring Service

- **Copernicus Marine Environment Monitoring Service (CMEMS)** provides information on the physical and biogeochemical state, variability and dynamics of the ocean and marine ecosystems for the global ocean and the European regional seas to support all marine applications, including:
 - marine safety
 - marine resources
 - coastal and marine environment
 - weather, seasonal forecasting and climate
- Provision of data on currents, winds and sea ice contribute to:
 - **marine safety**
 - the protection and the sustainable management of living **marine resources**
- Supports a wide range of **coastal and marine environment** applications:
 - physical and marine biogeochemical components are useful for water quality monitoring and pollution control
 - sea level rise is a key indicator of climate change and helps to assess coastal erosion
 - sea surface temperature elevation has direct consequences on marine ecosystems and the occurrence of tropical cyclones
- Many of the data delivered by the service (e.g. temperature, salinity, sea level, currents, wind and sea ice) also play a crucial role in the domain of **weather, climate and seasonal forecasting**

Eurosur Fusion Services

- S1 Incident Reporting #8
- S2 Vessel Monitoring and Tracking #10
- S3 Tracking Vessels of Interest #12
- S4 Vessel Detection #14
- S5 Meteo #16
- S6 Visual Data Discovery #19
- S7 Maritime Simulation Module #21
- S8 Satellite Imagery #23
- S9 Anomaly Detection #25
- S10 Visualisation Tools #27
- S11 Coastal Monitoring #29
- S12 Pre-frontier Monitoring #32
- S13 Reference Imagery/Mapping #35
- S14 Multipurpose Aerial Surveillance #38
- S15 Large Area Pre-Frontier Monitoring #40
- S16 Prodetect Service #42
- S17 Multi-Source (MUSO) Migration Analytical Assessment #44

How EFS work for environmental crimes?

S2 Vessel Monitoring and Tracking

- Current and historical vessel positions
- Data from ship reporting systems
- Information provided: IMO and MMSI numbers, vessel type, flag, other

S3 Tracking Vessels of Interest

- Daily update emails and situational reports on vessels of interest
- Information from ship reporting systems, satellite imagery, open sources, Frontex partners

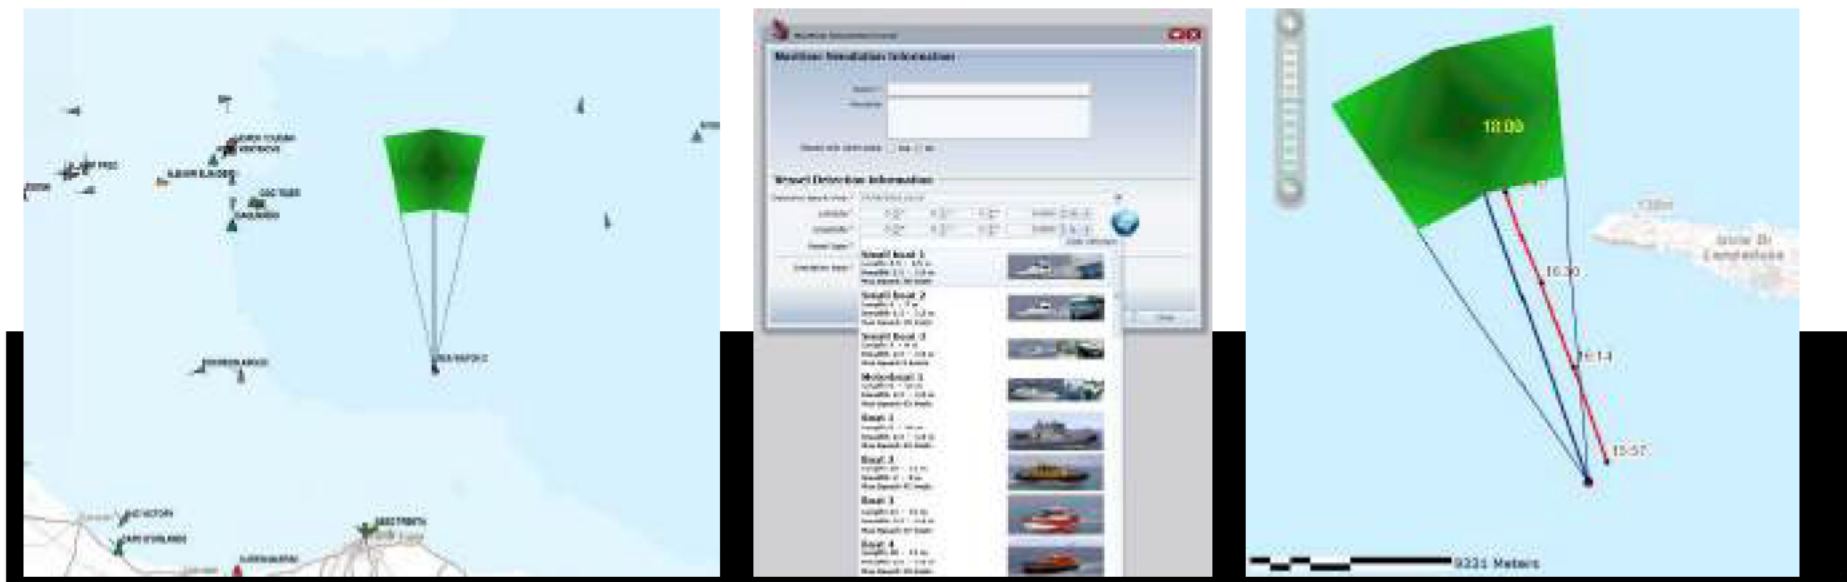

S4 Vessel Detection

- Satellite radar scans of maritime areas detecting objects on the sea
- Correlation with ship reporting data
- Notification on unidentified objects, even small boats

S7 Maritime Simulation

- Vessel position calculation
- Based on weather and vessel criteria (type, speed, last known position)
- Simulations up to 24 hours ahead (and 7 days back)

S8 Satellite Imagery

- Very high resolution (30 cm) satellite optical images
- Can cover border zones, pre-frontier and coastal areas of non-EU countries
- Raw satellite images offer the fastest confirmation of the situation on the ground

S9 Anomaly Detection

- Notifications on anomalous behaviour of vessels
- Based on information from ship reporting systems
- Anomalies: anchorage, speed change, distance to coast, other

S11 Coastal Monitoring

- Monitoring & analysis on specific **external coastal areas**
- Validating risk indicators
- Predicting patterns
- Contributing to save human lives
- Supporting analysis in tackling cross-border criminality
- Supporting strategic and operational intelligence

Search and rescue

Cross-border crime

Multipurpose Aerial Surveillance

Illegal fisheries control

S14 Multipurpose Aerial Surveillance

- Real-time surveillance for situational awareness in pre-frontier areas
- Data transmission from aircraft to European Monitoring Team at Frontex
- Coast Guard Functions cooperation with MS, EFCA

SERVICE REQUEST FORM

CATALOGUE SERVICE REQUEST

SERVICE REQUEST No. (to be filled in by Frontex)

1. Administrative details

From: <i>(to be filled in by Frontex)</i>	To: <i>(to be filled in by Frontex)</i> Frontex Bordo CRK 1 00-124 Warsaw (POLAND)
Operational Point of Contact:	Frontex Point of Contact:
Name:	Name: <i>(to be filled in by Frontex)</i>
Tel:	Tel: <i>(to be filled in by Frontex)</i>
E-mail:	E-mail: <i>(to be filled in by Frontex)</i>
Date:	

2. Description of requested service

2.1. Envisaged usage of the service (the need behind the service request)

Please describe the specific needs that make you request the service, for which purpose the service is necessary, what issue it is supposed to address, what improvement the service is expected to bring.

2.2. Service details

Please copy and paste the title to case a number of Catalogue Service is ordered.

Name and number of the Service as stated in the Service Catalogue	
Timeframes when the service is to be delivered (from... to...)	
Area covered by the service (please specify geo coordinates)	
Please specify used measurements (if applicable)	
Requested format	
Date of delivery	
Special requirements	

2.3. Users of the service

Please describe who will be the users/beneficiaries of the service, how many users/beneficiaries will have access to it, do you plan to further distribute the service (eg. outside of your authority). Please list all the intended users as well as the entities they use from.

- EMPACT label**
- EMPACT Environmental Crime Priority
 - OAP 2021
 - Operational Action 2.3

2.1. Envisaged usage of the service

2.2. Service details

Name and number of the Service as stated in the Service Catalogue
