Subject: GenX Technology: Industry and the Environment

Dear Mr Calleja Crespo,
Dear Ms Drake,
Dear Mr Sadauskas,
Dear Ms [REDACTED],
Dear Ms [REDACTED],
Dear Mr [REDACTED],
Dear Ms [REDACTED],

I am contacting you on behalf of Alber & Geiger, a EU government relations law firm. We are currently representing Chemours, a world leader in the chemicals business, specializing in titanium technologies, fluoroproducts and chemical solutions.

We would like to discuss with you the GenX process used by Chemours for the manufacturing of fluoropolymers, in view of the upcoming vote of ECHA's Member State Representatives on the 24th of June for its listing as a Substance of Very High Concern. Considering the use of Article 57f of REACH, the broad applications of GenX technology and the future of substances with similar chemical profile, we are seeking the opportunity to further present our position and also hear your views regarding a balanced approach pertained to the intersection of chemicals, the

environment and the internal market. Fluoropolymers enabled by GenX have broad and indispensable applications, from aerospace, automobile, electronics and cookware, to renewable energy, pharmaceuticals and medical products.

Chemours is seeking to take a responsible stance in the EU and reconcile industrial competitiveness and innovation with environmental commitments. Our products have numerous applications modern life, enhance quality and contribute to EU sustainability goals. We support high regulatory standards and we want to ensure our outmost contribution in that framework.

We would be very grateful to discuss the above with you in view of the upcoming voting, on a date and time of your convenience.

Best regards,
